Patent and Trademark Office
Washington, D.C. 20231

AMENDMENT AND RESPONSE

Sir:

In response to the Office action dated July 18, 2000, please amend the application as follows:

In the Claims

19. (Amended) A communication system of interconnected networks, the system comprising:
a mobile receiver; and
two or more networks interconnected by at least one message handling node for routing data packets; [and]
[at least one mobile receiver;]
wherein, each of the data packets includes a logical destination code for identifying the receiver independently of a physical media address in each of the data packets, the logical destination code uniquely identifying the mobile receiver to each of the networks and remaining fixed as the mobile receiver changes [the] networks; and
wherein, each message handling node routes data packets to the mobile receiver based on the destination code, wherever the mobile receiver is located within the two or more interconnected networks.
